Consumer Notes:

We hope that you're ready for the holiday season! This month, we've really got stuff at both ends of the anime spectrum for you ... if you prefer character-driven stories with a decidedly female twist, you should definitely check out Fushigi Yugi! This has long been famous in fansub circles, and will probably do very well. If, however, you prefer the adult product, this month brings in the nastiest thing we've EVER seen: Cool Devices. To put it bluntly, it's probably the most explicit product made yet and (to use that old saw) it's got a little something for everyone. Note that the later volumes are included in the box set, which ships on the same date as the first volume. There are these two releases and a bunch of stuff in between ... insuring that you'll have a VERY merry holiday season! Order early!

Please Note:

The holiday season is always the most volatile time of the year in terms of stock and shipping. While we feel that more than adequate supplies are on hand in our warehouses, there always seems to be one or two companies that ship late or in small numbers (and it never seems to be the same company twice, either).

This translates into a few SKU's that wind up short.
We've said it before and we say it again: order early!

JEFF'S PICK(S) OF THE MONTH

Darkstalkers sells well, but I'd go for Cool Devices if I were you. It's REALLY horrible ... and that means it's going to sell like crazy! Fetishistic and really explicit, you just sort of know that it's going to go through the roof! An adult title with no tentacles plus really nasty, can you believe it?
